

Android Tablet – OneDrive Installation

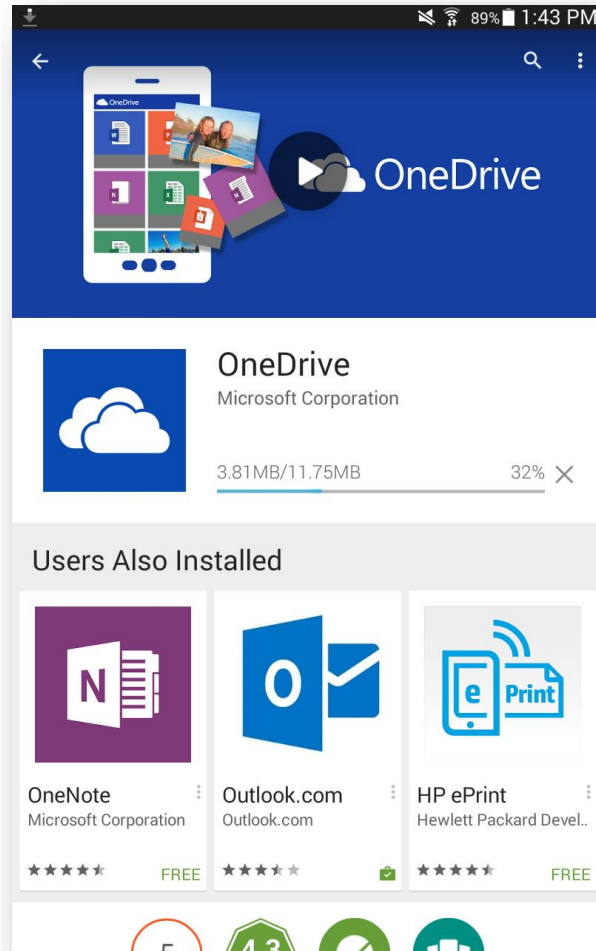

Note: Office for Android is only fully compatible for Android Phones, not tablets. Only OneDrive, OneNote, and Lync 2013 can be installed on an Android tablet. Third party products may be necessary on tablets when trying to open any OneDrive documents on a tablet.

To download the OneDrive app onto your Android tablet, log in to your Google Play Store account and search for OneDrive.

Once you have selected the app, press **Install**, and then **Accept**.

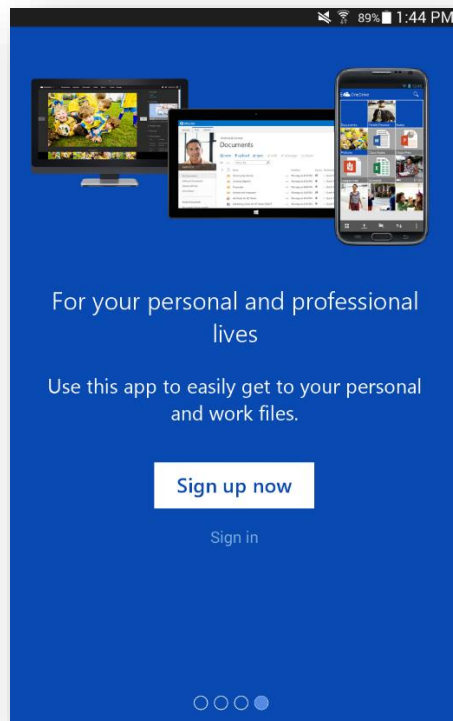

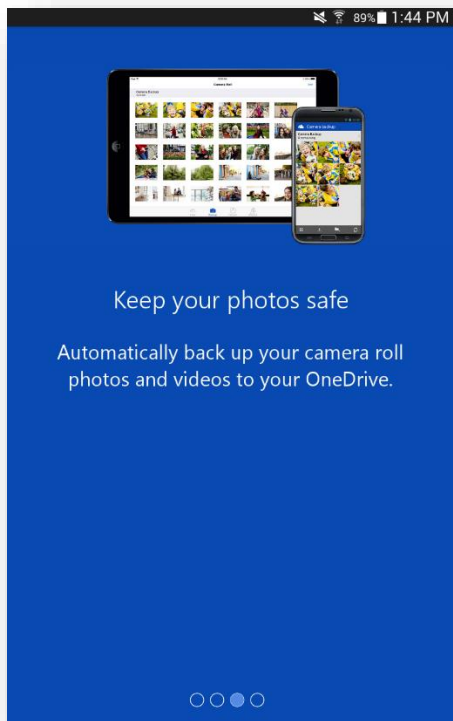

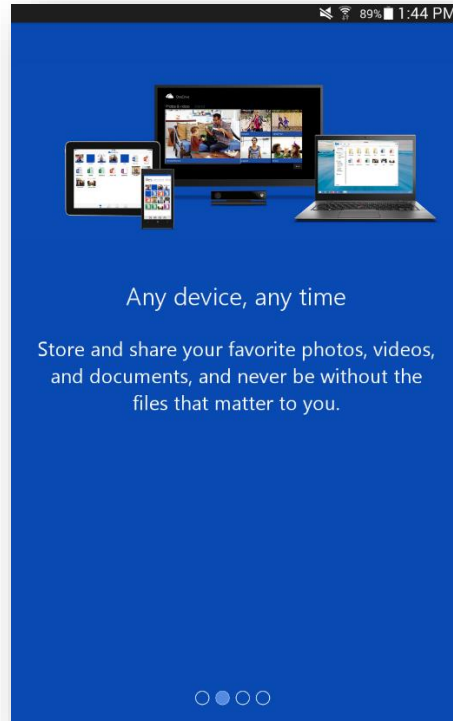

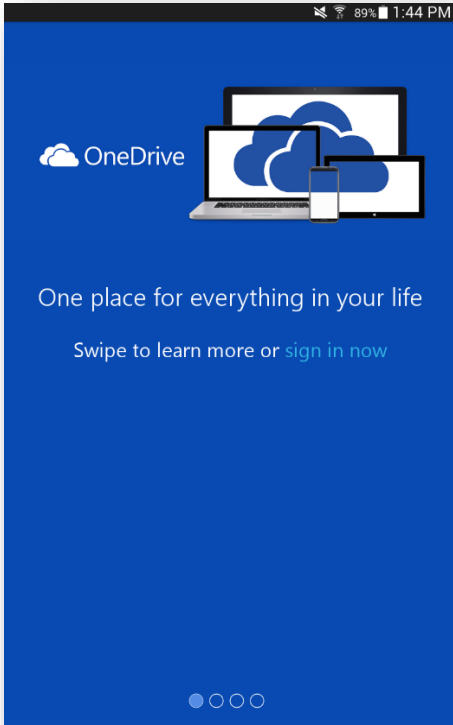

OneDrive will begin installing on your device.

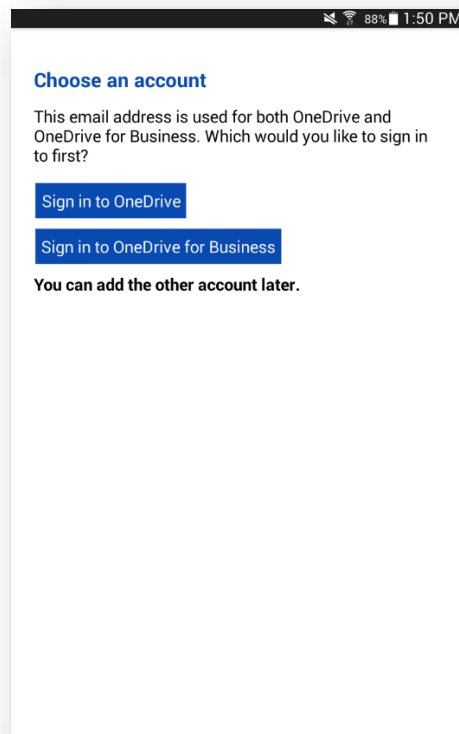

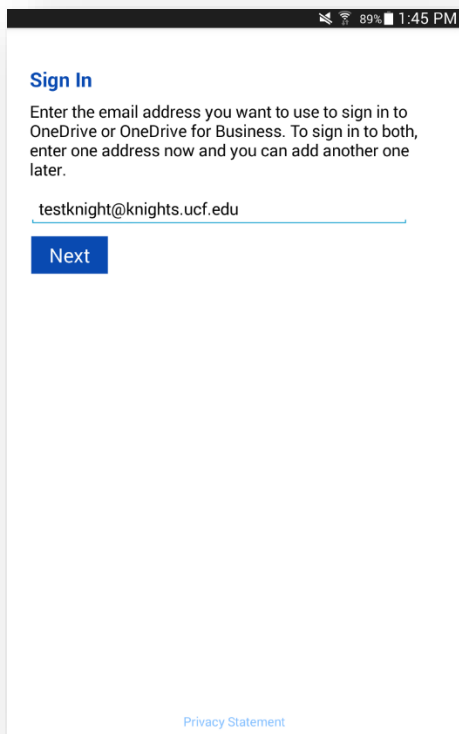

Once the installation process has finished, you will see the app appear on your main screen where you can then open it.

You will be guided through some information on the app, and then will be asked to **Sign In**.

Enter your Knights Email and select **Next**. Then press **Sign in to OneDrive for Business**. This is the account associated with Knights Email.

Type in your **password**, and then you will have full access to your OneDrive account through Knights Email on your tablet.
