

Editing a Word document in OneDrive

There are two ways to edit a document in Office 365 via OneDrive. The first, with Word Online, offers editing in the cloud. The second will open the document with Word on your desktop.

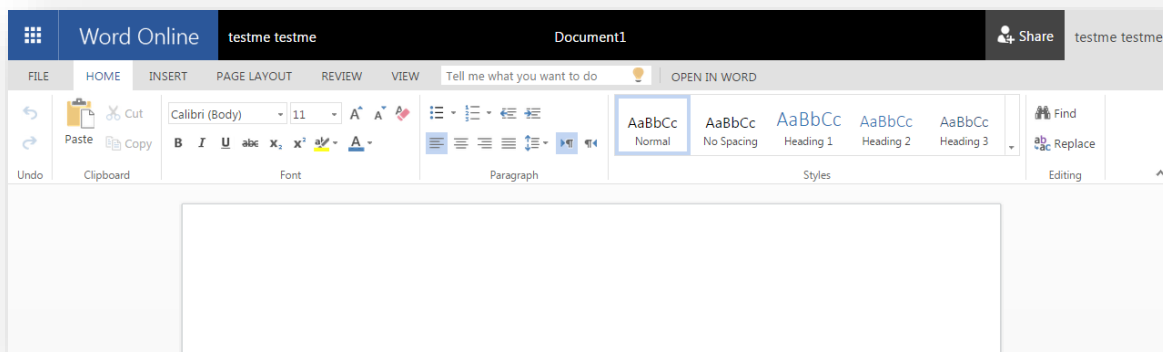

Word Online

Login to your Knights Email in Office 365, and click on OneDrive and select the document you wish to edit.

This will open your OneDrive document in the Read Only version. To edit, click **Edit Document** in the top left corner and select **Edit in Word Online**.

The document will then open in the editor and allow you to make changes to the document.

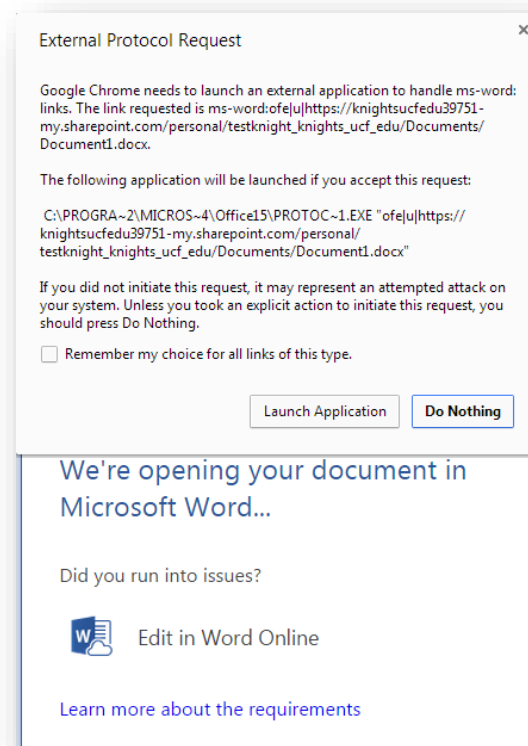

Word on the Desktop

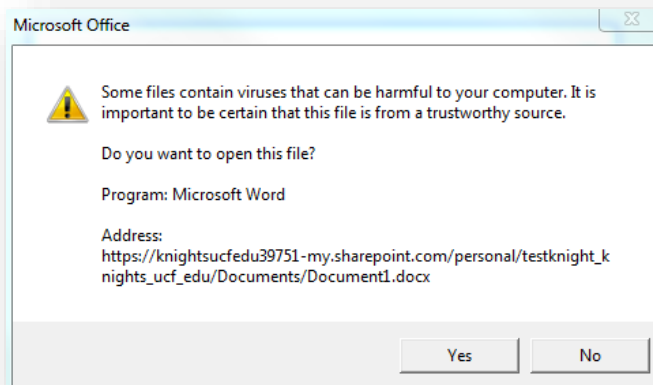

To edit a document with Word on your desktop, select **Edit in Word** when in the Read Only version of your OneDrive document.

You will likely get a series of pop-ups on your desktop asking for permission to launch the application.

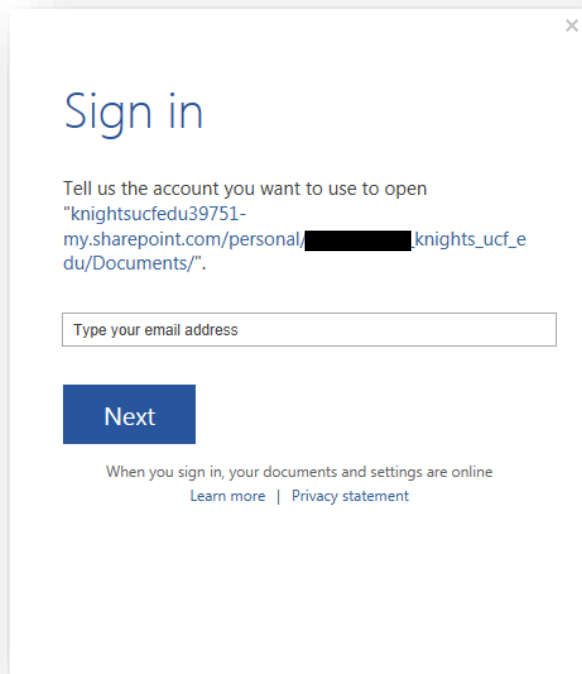

Click **Launch Application**.

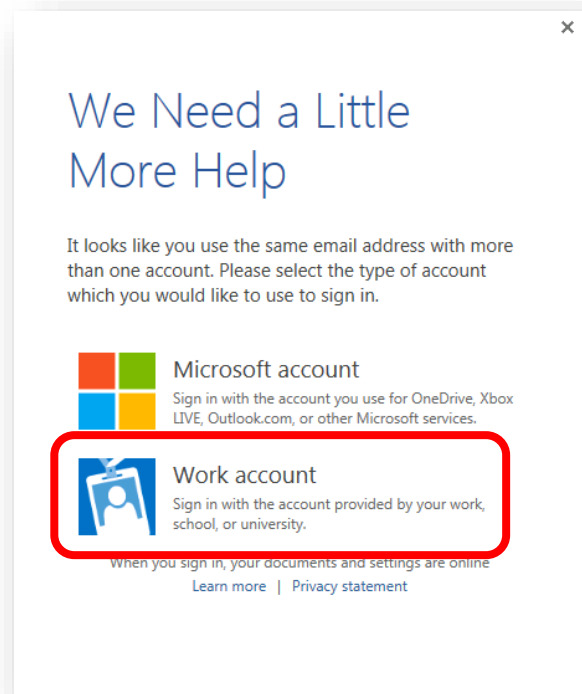

Click **Yes**.

Type in your Knights Email address and click **Next**.

Select **Work account**.

Then type in your Knights Email password and click **Sign in**.
