Go Wireless at UCF
Configuring iOS 7.x and above for UCF_WPA2

Before You Tap UCF_WPA2
Be sure your iPhone, iPad or iPod touch forgets all other UCF wireless networks. Otherwise it may refuse connection to the new UCF network you want to join. Most often this is will be the UCF_Guest network.

1. From the Home screen, tap **Settings**.
2. Tap **Wi-Fi**.
3. Tap the blue “i” on the right of the UCF network (e.g. UCF_GUEST)
4. Tap “Forget this Network”
5. Tap **Forget**

Join the UCF_WPA2 Network
After forgetting a UCF network, the Wi-Fi Networks screen will be showing. (If you did not forget a network, get to here from the Home screen by tapping Settings and then Wi-Fi). You will need your NID and NID password.

**Need your NID?** Visit http://my.ucf.edu to look up your NID.

**Need your NID password?** Visit http://mynid.ucf.edu to reset your NID password.

Your device should now be connected to UCF_WPA2

---

Your device should now be connected to UCF_WPA2

---

Updating Your NID Password
Your NID password will expire every 60 days. Please change the password using the NID Password Self Reset tool at http://mynid.ucf.edu before it expires and change it on all devices/systems that use it. Your account may become locked if a device is trying to use the old password. Your account will unlock 15 minutes after the last connection attempt.
